

# Workshops and Tutorials

## Sunday 27<sup>th</sup> May

Workshop Chairs: Raphaël Troncy, Alexandre Passant  
Tutorial Chairs: Irimi Fundulaki, Emanuele Della Valle

## *Sunday, May 27th*

- **Creating Knowledge out of Interlinked Data: The LOD2 Tool Stack** *by Sebastian Tramp, Bert Van Nuffelen & Sören Auer (morning session)*
- **Data models, Query Languages, Implemented Systems and Applications of Linked Geospatial Data** *Manolis Koubarakis, Kostis Kyzirakos & Manos Karpathiotakis (afternoon session)*
- **The Web of Data for E-Commerce in Brief** *by Martin Hepp (afternoon session)*

## *Creating Knowledge out of Interlinked Data: The LOD2 Tool Stack*

- The LOD2 Stack is an **integrated distribution** of aligned tools
- The LOD2 Stack supports the complete **Linked Data life-cycle**
- After attending this tutorial, you are able to **create, author, interlink & maintain Linked Data**

## *Data models, Query Languages, Implemented Systems and Applications of Linked Geospatial Data*

### ■ *Why this tutorial:*

- Lots of geospatial data available on the Web
- Lots of public data coming out of open government initiatives is geospatial.
- Lots of this public data is quickly being transformed into linked data and developers have started building applications with them.

Google™  
Maps

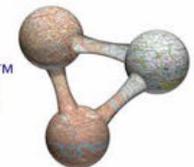

GeoNames

bing™  
maps

OS OpenData™

## *Data models, Query Languages, Implemented Systems and Applications of Linked Geospatial Data*

- Basic **concepts** from Geographical Information Systems
- Relevant Open Geospatial Consortium **standards**
- **Linked geospatial data**
  - Data models and query languages
  - Implemented **systems**
  - **Applications**

## *The Web of Data for E-Commerce in Brief*

- *GoodRelations ontology* used for applying Semantic Web Technology to *business challenges*.
  - *Conceptual Structures* of the Ontology
  - Tool Chain for *producing* and *consuming* GoodRelations-related data
  - *Long-term vision* of Linked Open Commerce
  - Discuss the challenges for *future research* in the field and *advanced topics* such as access control, and other data management issues

# What's on Today?

---

## ■ 6 Workshops

- Morning: Semantic big data processing (SBPM)
- Morning: Data or knowledge? (Know)
- Full Day: The RDF and REST love story (LAPIS)
- Full Day: How to discover resources? (RED)
- Full Day: Interoperability in Medical Informatics (SIMI)
- Afternoon: Finance and Economics on the SW (FEOSW)

# Semantic BPM workshop - 7 years of evolvment

(BIG (STREAMING)) DATA

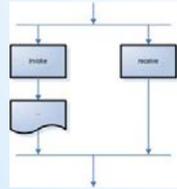

(Light-weight (real-time)) SEMANTICS

(real-time (ahead of )) TIME

2006 2007 2008 2009 2010 2011 2012

**Learn:** What is challenging for the Semantic Big Data Processing

**Understand:** How to extract and use semantics in informal business processes

**See:** How Smartphone is sending semantic events about missing calls

**Try:** How semantics supports processing in an AR (Augmented Reality) system

**Discuss:** Why is Business Process Management (still) one of the most promising application area for semantic technologies

**7<sup>th</sup> Semantic BPM workshop**

1982

"We are drowning in data,  
but starving for **knowledge**"

John Naisbitt

2001

„Properly designed, the Semantic Web  
can assist the evolution of human  
**knowledge** as a whole.“

Tim Berners-Lee, James Hendler,  
and Ora Lassilla

2012

17 paper titles with "data"  
1 paper title with "**knowledge**"  
(ESWC Conference Program)

**Room Thalia, 9:30 – 13:00**

**Know@LOD 2012: Come to where the knowledge is.**

# Did you notice?

**Services** are in a relationship with  
**The Semantic Web** and it's complicated.

**We did.**  
**And that's why we need you.**

**Join the LAPIS workshop  
to discuss why you hate services  
and the Semantic Web...**

**...or why you'd love  
to see them work together.**

# Semantic Interoperability in Medical Informatics

Experts and Researchers from **11 countries** present **8 papers** and **5 European projects**

## SIMI2012

SUNDAY  
27<sup>TH</sup> MAY 2012  
HERAKLEION

How can Semantic Web technologies **facilitate clinical research** and healthcare domains?

Which are the **challenges** stemming from **medical semantics**?

How can Semantic Web **boost Knowledge Extraction** in life sciences?

Knowledge Inference

Semantic Reasoning

Knowledge Acquisition

Clinical Decision Support

Speculative Sentences Annotation

Knowledge Editing

Biomedical Knowledge Evolution and Mapping Maintenance

Ontology Mapping

Secondary Use of Electronic Health Records

Clinical Research vs EHRs and Heterogeneity

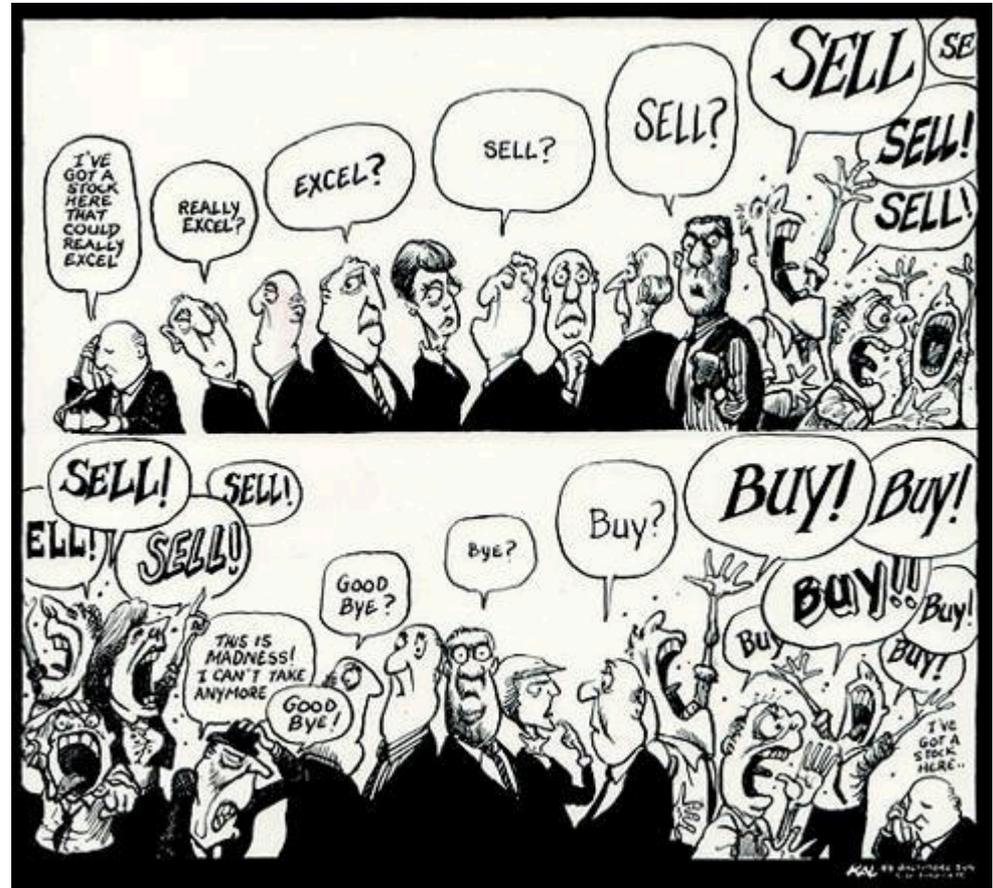

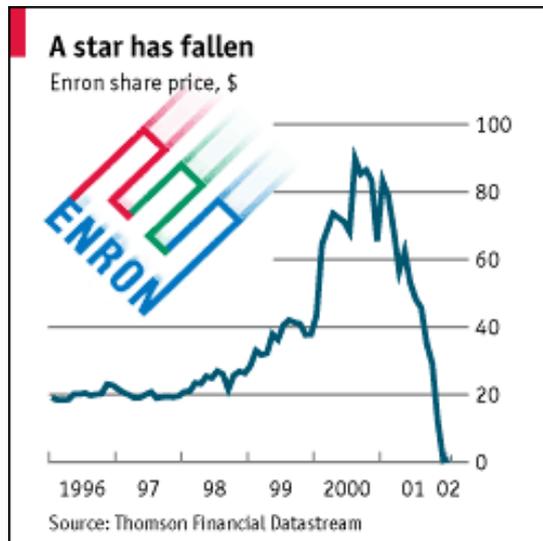

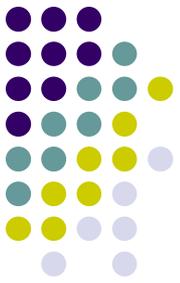

Convergence of Clinical Research and Clinical Care

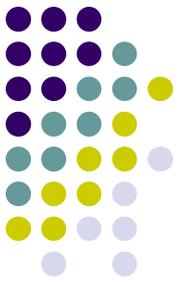

# 1<sup>st</sup> International Workshop on Finance and Economics on the Semantic Web (FEOSW): Yet Another Margin Call

# Financial Information: Crystal Clear?

# Semantic Web and Financial Information

- Linked Data can provide a reliable mechanism to share and spread Financial Information under a number of conventions
- Necessary standardization of Financial Information for shareholders and stakeholders

# Yet another Margin Call?

# What and Where

## Tutorials & Workshops: Sunday, May 27th, 2012

ROOM	HERMES	CLIO	EFTERPI	THALIA	MELPO	KALIA	ERATO	POLYMNEA	OURANIA	APOLLON
9:00 - 09:30	<b>Plenary: Highlights of the Day</b> Session Chairs: Alexandre Passant   Raphaël Troncy   Emanuella della Valle   Irini Fundulaki									OWLED Workshop
9:30 - 10:30		Tutorial 1: Creating Knowledge out of Interlinked Data: The LOD2 Tool Stack	Workshop 1 SBPM: Semantic Business Process Management	Workshop 2 KNOW: Knowledge Discovery and Data Mining Meets Linked Open Data	Workshop 3 LAPIS: Linked APIs for the Semantic Web: An essential problem in need of a fresh look	Workshop 4 RED: REsource Discovery			Workshop 5 SIMI: Semantic Interoperability in Medical Informatics	
10:30 - 11:00	COFFEE BREAK									
11:00 - 12:30		Tutorial 1: Creating Knowledge out of Interlinked Data: The LOD2 Tool Stack	Workshop 1 SBPM: Semantic Business Process Management	Workshop 2 KNOW: Knowledge Discovery and Data Mining Meets Linked Open Data	Workshop 3 LAPIS: Linked APIs for the Semantic Web: An essential problem in need of a fresh look	Workshop 4 RED: REsource Discovery			Workshop 5 SIMI: Semantic Interoperability in Medical Informatics	OWLED Workshop
12:30 - 14:00	LUNCH BREAK									
14:00 - 15:30		Tutorial 2: The Web of Data for E-Commerce in Brief - Good Relations	Tutorial 3: Data models, Query Languages, Implemented Systems and Applications of Linked Geospatial Data	Workshop 6 FEOSW: Finance and Economics on the Semantic Web	Workshop 3 LAPIS: Linked APIs for the Semantic Web: An essential problem in need of a fresh look	Workshop 4 RED: REsource Discovery			Workshop 5 SIMI: Semantic Interoperability in Medical Informatics	OWLED Workshop
15:30 - 16:00	COFFEE BREAK									
16:00 - 17:30		Tutorial 2: The Web of Data for E-Commerce in Brief - Good Relations	Tutorial 3: Data models, Query Languages, Implemented Systems and Applications of Linked Geospatial Data	Workshop 6 FEOSW: Finance and Economics on the Semantic Web	Workshop 3 LAPIS: Linked APIs for the Semantic Web: An essential problem in need of a fresh look	Workshop 4 RED: REsource Discovery			Workshop 5 SIMI: Semantic Interoperability in Medical Informatics	OWLED Workshop
